Risk of Bias for Non-Randomised Trials

Facilitator

Babasola Okusanya
Department of Obstetrics and Gynaecology, Faculty of Clinical Sciences, College of Medicine, University of Lagos

Objectives

- Introduce the risk of bias tool for non-randomised

- Identifying biases in non-randomized studies

- Arriving at an overall risk-of-bias judgement

- Incorporating confounding and co-interventions at protocol writing stage

- Risk of bias in certain circumstances: Follow-up (Cohort) studies; Uncontrolled and Controlled before-after studies

The workshop is targeted at researchers interested in non-randomised controlled trials and Cochrane authors doing reviews that include non-randomised studies.
