

## Critical appraisal of clinical practice guidelines

### Facilitator

Olabisi Oduwole

Department of Medical Laboratory Science, Achievers University, and Cochrane Nigeria

### Outline

- Introduction
- Why do we need to critically appraise practice guidelines
- Methods of appraising guideline
- Structure of the AGREE II
- How to appraise with the AGREE II
- Q & A

### Brief description of content

This part of the workshop on clinical practice guidelines will introduce participants to the need to critically appraise clinical practice guidelines (CPGs), what methods exist and the use of the Appraisal of Guidelines for Research & Evaluation II (AGREE II) tool to critically appraise CPGs. The AGREE II tool is a domain based internationally accepted instrument for assessing the methodological rigour and transparency of CPG.

A WHO clinical guideline
