

## Evidence-Informed Decision making: The Art, Science and Complexity of Knowledge Translation

**Workshop: 24-25 June 2019**

The Centre for Evidence-based Health Care, Faculty of Medicine and Health Sciences, Stellenbosch University, offers this 2 day workshop to provide **researchers** with a comprehensive understanding of what knowledge translation is and how to translate knowledge into accessible language and formats so that it can be effectively shared with different audiences.

**Venue:** Faculty of Medicine and Health Sciences, Stellenbosch University

### Objectives:

- Understand the science, art and context complexity of knowledge translation (KT)
- Map the power and interest of stakeholders in the particular research issues
- Design a KT strategy for intended audience/stakeholder(s)
- Identify strategies to disseminate the research outputs/strategies
- Outline a means of evaluating the dissemination/KT efforts

Upon completion participants will receive a Stellenbosch University short course certificate of attendance. It is also accredited for CPD points.

Attendance limited to 25 participants  
Cost R3 000.

The follow on workshop on *Engaging with Decision makers: Issue briefs for policy and practice* is offered immediately after (June 26-28 2019) with only 12 spots available to those who have taken this foundational course. Reserve your spots now!

**To secure your place, contact Traci Naidoo, [tracin@sun.ac.za](mailto:tracin@sun.ac.za), by 30 May 2019.**
