

Introduction to Qualitative Evidence Synthesis

Short Course: 13-15 November 2019

The Centre for Evidence-based Health Care, Dept. of Global Health, Faculty of Medicine and Health Sciences, Stellenbosch University, offers this 3-day short course to provide academic staff, students, researchers, reviewers and editors with the understanding of the principles to conduct and interpret qualitative systematic reviews.

Venue:

Room 2005, Education Building ,Faculty of Medicine and Health Sciences, Stellenbosch University

Objectives:

- Understand the principles of conducting and interpreting qualitative systematic reviews.
- Differentiate between the types, purpose and scope of qualitative reviews.
- Develop a well formulated research question appropriate for qualitative evidence synthesis.
- Be familiar with critical appraisal and methodological quality in qualitative systematic reviews.
- Understand and apply thematic analysis to included data within a qualitative review.
- Identify and understand relevant reporting guidelines for use with qualitative evidence synthesis.

Upon completion participants will receive a Stellenbosch University short course certificate of attendance. It is also accredited for CPD points.

Attendance limited to 25 participants
Cost R600.
