

GRADE – assessing certainty of evidence in systematic reviews

Facilitators

Solange Durão & Tasha Gloeck

Health Systems Research Unit, South African Medical Research Council

Learning objectives

1. Understand the principles of the GRADE approach, with respect to grading the certainty of evidence and the strength of recommendation
2. Describe the criteria used for rating certainty of the evidence up and down
3. Describe some considerations which can influence the strength of recommendations

Brief description of content

Interactive presentation about the GRADE approach for systematic reviews followed by group work and practical exercises to apply knowledge gained.
